INDEX OF THE MAPS OF FOREIGN COUNTRIES.

THIS index contains the names (about 90,000) given on the foreign maps of The Century Atlas — that is, on all the modern maps except those of the United States. Each line begins with the name of a place, or a river, or a mountain, etc., followed by the name of the country or large division in which it is found; the population (when the name is that of a place, or a country, etc.); the map-number; and the reference letter and figure by means of which the exact location of the name upon the map may be ascertained. Thus in the following diagram, Edinburgh would be indexed B 3:

The squares are formed on the map by the lines of longitude and latitude, and the reference letters and figures are placed on the borders of the map. The maps of the hemispheres, the region around the North Pole, and the islands of the Pacific Ocean, are indexed by imaginary squares formed by the space allotted to each letter and figure. Inset maps are indexed by imaginary squares formed by the meridians and parallels of the main map extended across them. Names such as *Mount Vesuvius* have been indexed both under the proper name (*Vesuvius*) and under the descriptive noun (*Mount*). Names which are found on the map proper and also on an inset map have been indexed where they appear to the best advantage; the largest places, however, have been indexed twice and referred to both maps. Rivers are indexed where the name is most readily found. In the case of an outlying possession (such as Corsica) which is shown in an inset map, the names are identified by the general title (for example, "France") of the map in which they occur.

Where a place may be known under different names or by various spellings of the same name, the different forms have to a large extent been inserted in the index and referred to the one which appears on the map.

The figures for population have, as far as practicable, been taken from the latest official censuses. Where these official census figures have been used the year of the census has been inserted (*e. g.* '95, for 1895). The letter "a" ("about") or the abbreviation "est." ("estimated") is placed before all figures not taken from a census. These estimates are based upon calculations furnished by the best authorities.

ABBREVIATIONS.

a. ..... about.	Fr. ..... French.
Br. ..... British.	Ger. ..... German.
est. ..... estimated.	I., Is ..... Island, Islands.
Mt., Mts. ..... Mountain, Mountains.
